

PL107N

Non-Contact Voltage Detector

Non-Contact Voltage Detector c/w LED & Audible Indication

The PL107N is a Non contact- optical and acoustic indication of AC voltages between 90-1000V. Clear, omni-directional flashing LED. Quick and accurate detection of cable breaks cables, Phase detection in sockets.

Features

- Contact-free audible and visual indication of AC voltages between 90 and 1000 V AC
- Clear, omnidirectional flashing LED
- Quick and accurate detection of cable breaks
- Detects microwave leakage
- Phase detection in sockets
- Press to test switch avoids nuisance buzzing and

Specifications

Voltage	
Indication	1 LED and Audible Buzzer
Voltage range	90 - 1000V AC
Operating temperature	-10° to 50°C
Overvoltage category	Cat 111 / 600 V
Other Information	
Power supply	2 x 1.5 V LR03 (AAA) batteries
Dimensions	150 x 22 x 21 mm
Weight	60g
