

SL906

SL906 Solar Spanners – Specification

The SL906 Solar Spanners are specialist tools designed for tightening Type 4 (MC4) connectors widely used in photovoltaic (PV) systems. The tool set is also fully compatible with NC4 and H4 connector types, providing installers with a reliable and versatile solution for creating secure, weather-resistant solar cable connections.

Key Features

Designed for MC4 connectors commonly found in PV installations

Compatible with NC4 & H4 connectors

Dual-ended tool design for quick tightening

Lightweight and durable construction

Safe, non-damaging fit for plastic solar connectors

Ideal for installation, servicing, and field maintenance

Technical Information

- Application - PV connector tightening
- Compatible Connectors - MC4, NC4, H4
- Tool Type - Dual-ended plastic spanner

Applications

Residential PV installations

Commercial solar systems

Off-grid setups

Solar farms and large-scale arrays

Maintenance and servicing work

Additional Information

- Ensures secure, reliable PV electrical connections
- Prevents damage to connector housings
- Speeds up installation time
- Compact tool ideal for toolkits and service vehicles
