# UT305H Forehead Infrared Thermometer

Special offer price

**£74.99**  
+ VAT

List price £109.99 +VAT

Temperature Range  
32°C- 42.9°C

Accuracy  $\pm 0.3^{\circ}\text{C}$

Response Time 250mS

High Temperature Alarm  
(audible and visual)

Normal Temperature

Elevated Temperature

- Temperature range of 32°C - 42.9°C (89.6°F - 109.2°F)
- High accuracy with resolution of 0.1°C
- Non contact 5cm - 10cm range
- Clear HD backlit screen
- Data Hold
- Tripod mountable
- LED & sound alarm trigger  $\geq 37.2^{\circ}\text{C}$

## Can Infrared Thermometer products be used to detect the coronavirus?

Well the simple answer is NO!

IR Thermometers cannot be used to detect or diagnose an infection.

However, selective type of IR Thermometers are being deployed in the field as an effective tool for measuring skin surface temperature and identifying individuals with elevated skin temperatures (EST).
